Projects:

• Yelp Camp: This project was part of a web development course on Udemy by Colt Steele. It's a full CRUD application, fully functional, where people can submit campgrounds and others can review them. In order to review or create a campground, you must have an account. This project was created using Node.js,

Express, MongoDB, and Bootstrap. Passport.js was used to handle authentication.

Features:
- Users can create, edit, and remove campgrounds.
- Users can review campgrounds once, and edit or remove their review.
- User profiles include more information on the user (full name, email,phone, join date), their campgrounds, and the option to edit their profile or delete their account.

- **Sociopedia**: It's a full stack responsive MERN application with Authorisation, Posts, Likes and Dark mode. In order to share a post, like a post or add a friend, users have to create an account first. This project was created using Node.js, Express.js, MongoDB, React and MUI.
  Features:
  - Users can create, edit, and like a post.
  - Users can add other friends.
  - User's profile include more information on the user (full name, location, LinkedIn and twitter), and there list of friends.

- **Amazon- clone**: This is an Amazon shopping site's clone version. In this project users are able to add items to the cart and also purchase the products using card via stripe payment method.
  This project was created using React and Firebase for Authentication, database and Hosting.

- **Movies-searching**: A simple application that allows the user to search for any title for a movie.

- **Sticky notes**: It's a simple, easy-to-use, fast and efficient note taking application, created using React.
  Features:
  - Users can create, edit, and delete notes.
  - Users can create many notes at the time and move them around and stick anywhere on the screen.

- **Ping-Pong score Keeper:** This project is my version of a Scorekeeper for games like Ping Pong, created as part of my Web Developer Bootcamp 2023 by Colt Steele.

- **E-Commerce web Shop:** It's a fully functional eCommerce application using commerce.js as well as Stripe for card transactions.
